

**THE PRICE OF BASIC TREATMENT**

Paid by patient

|  |  |           |
|--|--|-----------|
| IVF cycle with donated eggs (DIVF, OD)   | Consultation, treatment plan, protocol preparation, selection + STANDARD stimulation and compensation of the donor, donor's egg retrieval, sperm analysis and preparation, male partner's STDs testing, ICSI, extended cultivation, embryo transfer (fresh embryo)<br>(MFSS / MACS, PICSI, EmbryoGlue, TimeLaps cultivation and cryopreservation are not included) | 5 525 EUR |
| IVF cycle with own eggs (IVF)  | Consultation, treatment plan, protocol preparation, stimulation process monitoring, egg retrieval, sperm analysis and preparation, ICSI, extended cultivation, embryo transfer (fresh embryo)<br>(2x STDs testing, MFSS / MACS, PICSI, EmbryoGlue, TimeLaps cultivation, cryopreservation and general anesthesia are not included)                                 | 3 245 EUR |
| IVF minimal stimulation (IVF min)  | Consultation, treatment plan, protocol preparation, minimal stimulation, cycle monitoring, egg retrieval, sperm analysis and preparation, embryo transfer (fresh embryo)<br>(2x STDs testing, ICSI, extended cultivation, MFSS / MACS, PICSI, EmbryoGlue, TimeLaps cultivation, cryopreservation and general anesthesia are not included)                          | 1 595 EUR |
| IVF native cycle (IVF nativ)   | Consultation, cycle monitoring, egg retrieval, sperm analysis and preparation, embryo transfer (fresh embryo)<br>(2x STDs testing, ICSI, extended cultivation, MFSS / MACS, PICSI, EmbryoGlue, TimeLaps cultivation, cryopreservation and general anesthesia are not included)   | 1 100 EUR |
| Frozen embryo transfer (FET)   | Thawing of embryo and embryo transfer<br>Thawing of embryo 400 EUR<br>Embryo transfer 415 EUR  | 815 EUR   |
| Donated embryo (DEM)   | Thawing and embryo transfer of one donated embryo  | 1 730 EUR |
| Donated embryo after PGS testing   | Thawing and embryo transfer of one donated embryo after preimplantation genetic screening  | 3 065 EUR |
| Intrauterine insemination (IUI)  | Including capacitation of the sperm  | 310 EUR   |
| Social freezing (eggs collection and freezing)   | Consultation, treatment protocol, stimulation, egg retrieval in general anesthesia, cryopreservation of the eggs and 1 year of storage<br>(STDs testing is not included)   | 2 190 EUR |
| IVF with own frozen eggs   | Thawing of eggs, sperm analysis and preparation, ICSI, extended cultivation, embryo transfer (fresh embryo)<br>(2x STDs testing, MFSS / MACS, PICSI, EmbryoGlue, TimeLaps cultivation and cryopreservation are not included)   | 1 925 EUR |
| Treatment cancelled before the egg collection  |  | 130 EUR   |
| IVF native cycle where no eggs suitable for fertilization were collected during the retrieval* |  | 270 EUR   |
| IVF cycle without eggs suitable for fertilization*   |  | 565 EUR   |
| IVF min + IVF cycle where no embryos suitable for embryo transfer or freezing were available** |  | 1 175 EUR |

EC = extended cultivation, STD = sexually transmitted diseases testing.

\* Price of additional procedures will be charged extra, whenever they apply.

**TREATMENT PROGRAMS**

Paid by patient

|  |  |            |
|--|--|------------|
| IVF cycle with donated eggs<br>Lite<br>(DIVF Lite)                             | Consultation, treatment plan, protocol preparation, selection + SOFT stimulation and compensation of the donor, donor's egg retrieval, sperm analysis and preparation, male partner's STDs testing, ICSI, extended cultivation, embryo transfer (fresh embryo), cryopreservation of sperm and 1 year of storage<br>(MFSS / MACS, PICSI, EmbryoGlue, TimeLaps cultivation and cryopreservation are not included)  | 3 790 EUR  |
| IVF cycle with donated eggs<br>Premium<br>(DIVF Premium)                       | Consultation, treatment plan, protocol preparation, selection + STANDARD stimulation and compensation of the donor, donor's egg retrieval, sperm analysis and preparation, male partner's STDs testing, ICSI, extended cultivation, embryo transfer (fresh or frozen embryo) up to six months after fertilization, cryopreservation of all embryos and 1 year of storage, EmbryoGlue, one of the methods: TimeLaps cultivation, or MFSS / MACS<br>(PICSI and the one not chosen methods from TimeLaps cultivation or MFSS / MACS are not included) | 6 320 EUR  |
| IVF cycle with donated eggs<br>Baby Guarantee Program<br>(DIVF Baby Guarantee) | Consultation, treatment plan, protocol preparation, selection + STANDARD stimulation and compensation of the donor, donor's egg retrieval, sperm analysis and preparation, male partner's STDs testing, ICSI, extended cultivation, up to 4 transfers**, cryopreservation of all embryos and storage**<br>(MFSS / MACS, PICSI, EmbryoGlue, TimeLaps cultivation are not included)  | 11 110 EUR |
| IVF cycle with own eggs –<br>Optimal<br>(IVF Optimal)                          | Consultation, treatment plan, protocol preparation, stimulation process monitoring, egg retrieval under general anesthesia, sperm analysis and preparation, embryo transfer (fresh or frozen embryo) up to six months after fertilization, 2x STDs testing, ICSI, extended cultivation, cryopreservation of all embryos and 1 year of storage<br>(MFSS / MACS, PICSI, EmbryoGlue, TimeLaps cultivation are not included)   | 4 985 EUR  |
| IVF cycle with own eggs –<br>Genetic Insight<br>(IVF Genetic Insight)          | Consultation, treatment plan, protocol preparation, stimulation process monitoring, egg retrieval under general anesthesia, sperm analysis and preparation, embryo transfer (frozen embryo) up to six months after fertilization, MFSS / MACS, 2x STDs testing, ICSI, extended cultivation, PGT-A of all embryos, consultation of PGT-A results with a geneticist, cryopreservation of all embryos and 1 year of storage<br>(PICSI, EmbryoGlue, TimeLaps cultivation are not included)   | 7 775 EUR  |
| IVF cycle with own eggs –<br>All-inclusive<br>(IVF All-inclusive)              | Consultation, treatment plan, protocol preparation, stimulation process monitoring, egg retrieval in general anesthesia, sperm analysis and preparation, two methods of sperm selection – PICSI + MFSS or MACS, 2x STDs testing, ICSI, TimeLaps cultivation, extended cultivation, EmbryoGlue, embryo transfer (fresh or frozen embryo) up to six months after fertilization, cryopreservation of all embryos and 1 year of storage  | 6 410 EUR  |
| IVF minimal stimulation –<br>Low Responder<br>(IVF Low Responder)              | Consultation, treatment plan, protocol preparation, stimulation process monitoring, egg retrieval in general anesthesia, sperm analysis and preparation, 2x STDs testing, ICSI, extended cultivation, embryo transfer (fresh or frozen embryo) up to six months after fertilization, cryopreservation of all embryos and 1 year of storage<br>(MFSS / MACS, PICSI, EmbryoGlue and TimeLaps cultivation are not included)   | 3 770 EUR  |
| Donated embryo<br>(DEM 2+1)<br>Special offer 2+1 ***                           | 1 <sup>st</sup> FET DEM  | 1 990 EUR  |
|  | 2 <sup>nd</sup> FET DEM  | 1 990 EUR  |
|  | 3 <sup>rd</sup> FET DEM  | 0 EUR      |

\*\* Further information about the Baby Guarantee Program will be provided by the treatment coordinator or the doctor.

\*\*\* DEM 2+1 for more information contact your doctor.

**PREIMPLANTATION GENETIC SCREENING (PGT-A / PGT-SR / PGT-M)**

Paid by patient

|   |  |               |         |
|---|--|---------------|---------|
| PGS (PGT-A, PGT-SR)   | Biopsy + examination of 1 embryo   | 600 EUR       |         |
| PGD (PGT-M)   | Preparation for karyomapping   | 1 995 EUR     |         |
|   | Biopsy + examination of 1 embryo   | 775 EUR       |         |
| Sanger sequencing   | This examination is carried out after prior agreement with the laboratory in case there is no reference to perform PGT-M by the karyomapping method, it is only paid as additional payment to this method. | 740 EUR       |         |
| Genetic testing of frozen embryo (PGT + recryopreservation) | First embryo + 1 year of storage + biopsy  | 1 040 EUR     |         |
|   | Each additional embryo   | 735 EUR       |         |
| Amplification of DNA  | 1 embryo + biopsy. If at least 3 embryos are tested for PGT, only the amplification can be performed on the remaining embryos and the testing itself can be postponed.                                     | 120 EUR       |         |
| Consultation of PGS/PGD results                             | Appointment for consultation and interpretation of the results of the examined embryos.  | 40 EUR        |         |
| Genetic Compatibility Testing                               | It can be used in DIVF treatment when a genetic mutation is known in the partner that we do not want to pass on to the offspring.  | 1 Gene        | 240 EUR |
|   |  | 2 Genes       | 310 EUR |
|   |  | 3 Genes       | 360 EUR |
|   |  | 4 to 10 Genes | 405 EUR |
| Whole Exome Sequencing                                      | Reading the genetic information of all coding regions of genes in the genome to identify mutations associated with genetic diseases  | 1 950 EUR     |         |

**ADDITIONAL PROCEDURES / EXAMINATIONS**

Paid by patient

|   |  |         |
|---|--|---------|
| Cryopreservation of embryos                     | First 2 straws (1 or 2 embryos in a straw) + 1 year of storage                                     | 440 EUR |
|   | Each additional straw (1 or 2 embryos in a straw)  | 135 EUR |
| Cryopreservation of eggs                        | All straws + 1 year of storage   | 465 EUR |
| Thawing of eggs                                 | All straws in one treatment  | 340 EUR |
| Cryopreservation of sperm                       | Sperm freezing + 1 year of storage (STD is not included)   | 305 EUR |
| Cryopreservation of sperm outside working hours | Surcharge for cryopreservation of the sperm outside of normal working hours and during the weekend | 305 EUR |
| ICSI of a single egg                            | Injection of a single sperm into an egg. One single egg<br>Price is for IVF min and IVF native     | 190 EUR |
| ICSI all  | Injection of a single sperm into an egg. All eggs<br>Price is for IVF treatment                    | 620 EUR |
| PICSI   | ICSI surcharge of pre-selected sperm   | 355 EUR |
| PLM   | Examination of egg maturity by polarization microscope   | 395 EUR |

|                                    |   |           |
|------------------------------------|---|-----------|
| Extended cultivation (EC)          | Above standard cultivation of embryos beyond 48 hours to blastocyst stage                                       | 455 EUR   |
| TimeLapse cultivation (TL)         | Continuous embryo monitoring during their cultivation<br>The price includes 16 embryos                          | 355 EUR   |
| Assisted Hatching (AH)             |   | 250 EUR   |
| ZonaFree transfer                  |   | 250 EUR   |
| EmbryoGlue                         | Implantation support medium after repeated failures   | 365 EUR   |
| STD                                | Sexually Transmitted Diseases testing   | 115 EUR   |
| Implantation Window Test           | ERA Test - First examination (ES)   | 1 415 EUR |
|                                    | ERA Test - Repeated examination (ES)  | 1 140 EUR |
|                                    | EndomeTrio (ERA + EMMA + ALICE)   | 1 855 EUR |
|                                    | EMMA Test (incl. ALICE) - extension of the ERA test to include microbiome testing                               | 1 065 EUR |
|                                    | GERT (CZ)   | 640 EUR   |
|                                    | BeReady (EST)   | 865 EUR   |
| CD 138 antigen test (endometritis) | Collection, processing, and testing, including the price of the catheter  | 170 EUR   |
| Application of Intralipids         | Including the price for Intralipids   | 180 EUR   |
| Pipelle scratching                 |   | 55 EUR    |
| „Mock“ trial transfer              |   | 60 EUR    |
| Examination of uNK cells           | Examination of uterine NK cells   | 295 EUR   |
| Elective FET date                  |   | 160 EUR   |
| SPG                                | Sperm analysis  | 50 EUR    |
| DNA fragmentation                  | DNA damage assessment in spermatozoa  | 235 EUR   |
| ASA                                | Antibodies against spermatozoa assessment   | 60 EUR    |
| MACS                               | Magnetic separation of spermatozoa  | 475 EUR   |
| MFSS                               | Microfluidic Sperm Sorting  | 350 EUR   |
| Stimulation of sperm motility      | Medium for stimulation of immobile sperm before fertilization   | 215 EUR   |
| TESE                               | Testicular sperm extraction in general anesthesia<br>(STDs testing and sperm cryopreservation are not included) | 1 545 EUR |
| Semen culture test                 | Evaluation of microbiological contamination of the ejaculate  | 120 EUR   |
| Sperm capacitation                 | Sperm preparation prior IUI   | 105 EUR   |
| General anesthesia                 |   | 205 EUR   |

|  |   |         |
|--|---|---------|
| Preoperative blood tests   | Basic Blood tests                                       | 40 EUR  |
| Preoperative blood tests   | Expanded Blood tests (for example before TESE)          | 90 EUR  |
| Preparation of cell transport  | Preparation of reproductive cell transport              | 185 EUR |
| Consultation and preparation of FET treatment with your own imported embryos   | The price does not include frozen embryo transfer (FET) | 340 EUR |
| Consultation and preparation of FET treatment of patient with a surrogate mother, using patient's own imported embryos | The price does not include frozen embryo transfer (FET) | 680 EUR |
| HLA-C typing of 1 female donor or 1 male donor   |   | 600 EUR |
| Donated sperm  | Donated sperm from Reprofit cryobank                    | 490 EUR |
| Donated sperm storage  | 2 samples up to 5 years                                 | 185 EUR |
|  | 1 year  | 205 EUR |
|  | 2 years   | 325 EUR |
|  | 3 years   | 405 EUR |
|  | 4 years   | 520 EUR |
|  | 5 years   | 580 EUR |
| Extending storage of frozen embryos, eggs or sperm   |   |         |
